

# Wie eet wat kaart

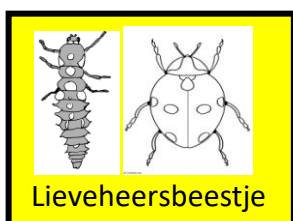

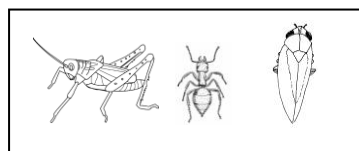

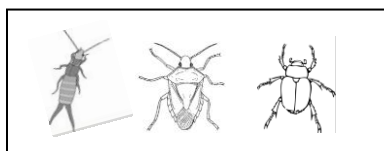

Wespen eten vooral vliegende diertjes.  
Ze bijten ze in kleine stukjes en voeren ze aan de jonge wespen.

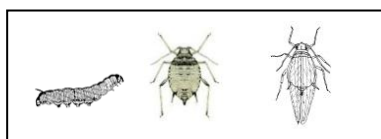

Spinnen met een web eten vliegende diertjes.  
Ze vangen die in hun web.

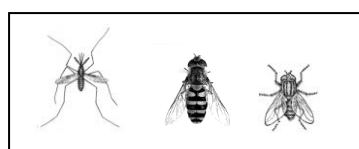

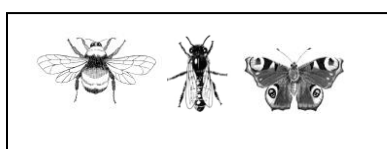

Jachtspinnen eten kruipende diertjes.

Lieveheersbeestjes en hun larven eten kruipende diertjes,  
bijna uitsluitend bladluizen.

Libellen eten vliegende diertjes.
